## 911 SIGN LOCATION

The property identification (911) sign must be installed at right angles to the road, so the numbers are clearly visible to a vehicle approaching from either direction. The sign should be located central to the front of the house/building. There should be a minimum of 30 meters of clear sight distance in either direction from the center point of the traveled portion of the road to the sign.

The property identification sign shall be located not less than 4 meters from the edge of the pavement and not more than 1.0 meter inside the property line. Where there is a sidewalk, the sign shall be located  $\pm$  1.0 meter back from the inside edge of the sidewalk. In rural areas where there are rural mailboxes, the sign may be located above or below the mailbox, if the mailbox is located on the same side of the road and immediately adjacent to the property access point.

The mounting height of the sign shall be between 1.0 meters and 1.2 meters above ground level.

## **Shared Driveways**

Where two or more properties share a driveway, signs can be mounted on the same post, however, placement of said signs shall be placed consistent with the descending or ascending property addressing scheme.
